

In-Sight™ Machine Vision Systems

COGNEX EASYBUILDER TRAINING

EasyBuilder® doesn't require users to learn programming, enabling them to focus on what's most familiar... the part!

The EasyBuilder® interface walks you through the process of setting up your vision application step by step. Great for novice users, the application is deployed and running in a very short time.

There is no need to bring anything; all the hardware will be provided for the training.

**January 18th, 2017
9:00 AM - 4:00 PM
*Lunch is provided***

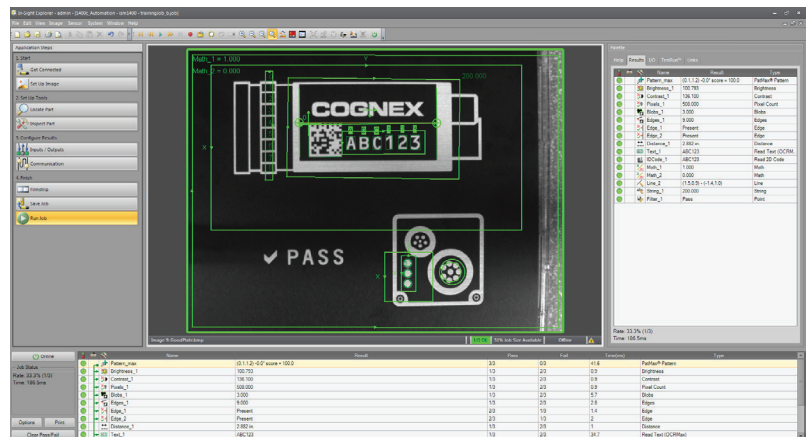

Agenda Topics:

- Vision Hardware Basics
- In-Sight Explorer Basics
- Vision Tools
 - Calibration
 - Location
 - Presence/Absence
 - Measurement
 - Counting
 - Identification
 - Math and Logic
- I/O Configuration

Cost: \$295.00

Who should attend?

Engineers, Technicians or anyone who will be programming or maintaining your Cognex In-Sight vision systems.
