

# COGNEX EASYBUILDER TRAINING

## In-Sight™ Machine Vision Systems

The In-Sight™ EasyBuilder® Software does not require users to learn programming, enabling them to focus on what is most familiar- the part!

The EasyBuilder® interface walks you through the process of setting up your vision application step by step. It is great for novice users, the application is deployed and running in a very short time.

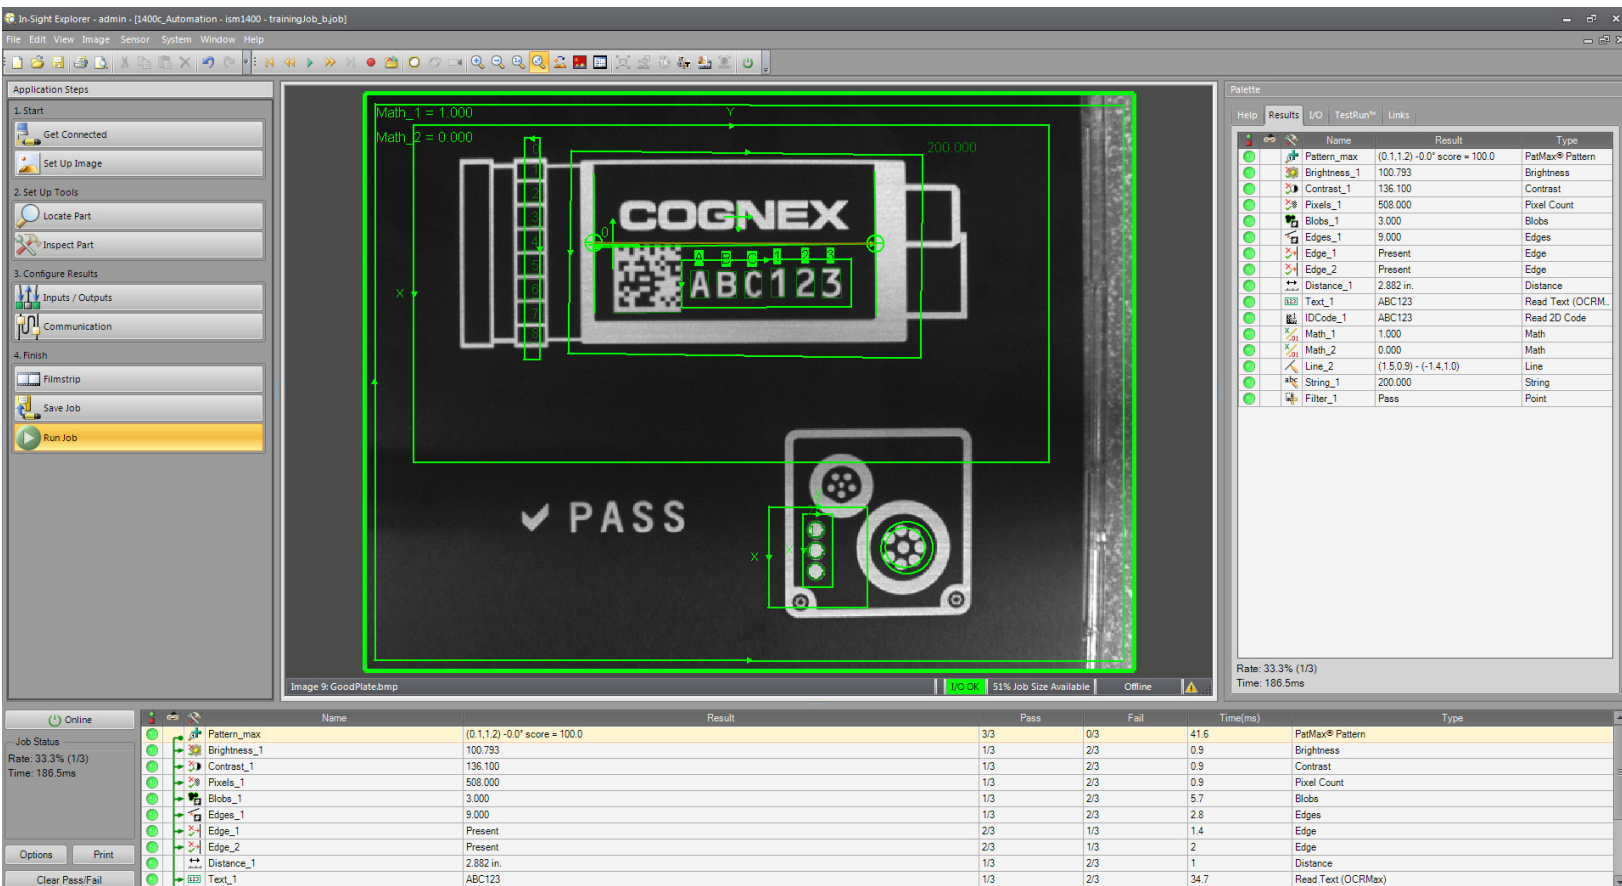

Cost: \$295.00

9:00 AM- 4:00 AM  
Lunch is provided

The screenshot displays the In-Sight Explorer software interface. The main window shows a grayscale image of a plate with the text 'COGNEX' and 'ABC123'. A green bounding box is drawn around the text, and a 'PASS' indicator is visible. The interface includes a left sidebar with application steps (1. Start, 2. Set Up Tools, 3. Configure Results, 4. Finish) and a right sidebar with a results palette and a bottom status table.
